beginning with a historical analysis of the origins of the philippine dependency relationship with the united states the book goes on to argue that the philippine state acquired some degree of autonomy in formulating national policies it reveals that while the philippine political system is based on free wheeling capitalism led by private enterprise state intervention in the economy has been more extensive than the economic ideology suggests

the year 2011 marks the twentieth anniversary of the end of the soviet union this may be an appropriate time to evaluate the adoption by previously state socialist societies of other economic and political models the transition has sometimes been described in positive terms as a movement to free societies with open markets and democratic elections others have argued that the transition has created weak poverty stricken states with undeveloped civil societies ruled by unresponsive political elites which is the more accurate assessment david lane examines a few of the theoretical approaches that help explain the trajectory of change from socialism to capitalism he focuses on two main approaches in this volume elite theories and social class

theories dwelling on the role of elites regard the transformation from socialism to capitalism as a type of system transfer in which elites craft democratic and market institutions into the space left by state socialism lane contrasts this interpretation with class based theories which consider transformation in terms of revolution and explain why such theories have not been considered the best way of framing the transition in the post socialist states while recognizing that elites can play important roles and have the capacity to transform societies lane contends that elite theories alone are inadequate to explain a system change that brings free markets in contrast he proposes a class approach in which two groups characterize state socialism an administrative class and an acquisition class
